## A.T.H.S. Homecoming Set for October 5, Football and Dance

### Parade and Pep Session on Friday Evening Before Homecoming Game

Antioch Township High School has completed many of the plans for the annual Homecoming which will be held Saturday, Oct. 5.

Tradition will be followed through an election of a Homecoming Queen and her court and a parade and a bonfire pep session on the Friday night before.

Business men are invited to place floats and decorated cars in the parade and prizes will be awarded for the three best floats and the three best decorated cars. The queen and her court will be in the parade, which will be headed by the school band.

The Homecoming football game will be at 8 p.m. Saturday with Round Lake serving as the opponent. This will attract many returning alumni as will the dance in the boys' gymnasium afterward. The Art Smejkal band will provide the music.

The main event of the evening will be the crowning of the queen and king at intermission.

All alumni of the school are invited to return and meet former classmates and see the new students.

## George Pitman, 83, Formerly of Antioch Dies in Seattle, Wash.

George H. Pitman, 83, a former resident of Antioch, died at Seattle, Wash., Sept. 11 while on the way to a hospital from his home at 818 32nd ave. in that city.

Funeral services were held in Seattle last Sunday and burial was in Mount Pleasant cemetery.

Mr. Pitman was born in Antioch township. He and his wife, Virginia, were married Nov. 21, 1900, in Waukegan. In 1929 they moved to Friday Harbor, Wash., where they farmed 11 years before moving to Seattle in 1940.

Surviving are the widow, a sister, Mrs. Eva Shultz, and a brother, Earl C. Pitman, both of Antioch.

## Johnson Motors Gives Scholarships to Area High School Graduates

Johnson Motors, one of the leading industrial firms in Lake County, announced today it has established a scholarship program for high school graduates in this area.

J. L. Rayniak, division manager, reported Johnson will cooperate as a sponsor with the National Merit Scholarship Corporation of Evanston, Ill. This is an independent non-profit organization created to administer scholarship programs.

Under the Johnson program, funds will be provided for two scholarships annually. On one of these, first preference will be given to the son or daughter of a Johnson employee. This requirement will not apply to the second, or matching scholarship awarded.

Mr. Rayniak pointed out that the Johnson Motors scholarships also would give preference to students interested in mechanical engineering, some other phase of engineering, business administration or liberal arts, in the order listed.

Students interested in applying for one of the scholarships should make arrangements with their high school principal to take the National Merit Scholarship qualifying tests, October 22. Local high schools will select students to take the test on a basis of scholarship, leadership, citizenship and student activities.

Amounts of the scholarship awards will vary from a minimum of \$100 per year to full tuition and living costs, Rayniak said, depending on financial needs of winning candidates. Schools attended by the winning candidates also will be given funds to help pay their costs of educating the student.

## Scout Membership Drive

Troop No. 92 Boy Scouts of America on Sept. 10 started its membership drive which will continue for another month. Boys, ages from 11 to 14 are eligible for membership. There will be first, second, and third prizes for scouts who recruit the most new members. The North Shore area council at present is conducting a scout membership drive.

## Make Order of the Arrow

Bud Dittman and Chester White received their ordeal membership in the Order of the Arrow at a convocation held in Wheeling Sept. 6 and 7. Jerry Jacobs and James Horton accompanied them.

## Sales Tax \$4,600 in Antioch For June

Antioch, which transacts more business for its size than any other village in Lake County, will get \$4,600.14 sales tax on business done in June, a report from the Illinois State Treasurer announced.

Collection was made in July, and after expense of state collection is taken out the rest will go into the village treasury.

The total collection for the 934 cities and villages was \$4,045,015.98. The cost of collection was \$258,192.58.

Collections of other nearby villages in Lake county were Fox Lake, \$4,755.49; Lake Villa, \$751.76; Libertyville, \$7,335.16; Grayslake, \$2,231.85; Zion, \$3,936.03.

## Mrs. W. C. Petty At Scholarship Comm. Meeting

Mrs. W. C. Petty, 1038 Spafford st., will go to Springfield tomorrow to attend as a member the first meeting of the State Scholarship commission.

Mrs. Petty was appointed to the commission by Governor William G. Stratton. She and the six other members will organize for the work of supervising a program that will provide \$600,000 in the current biennium for scholarships, good for tuition and fees at either private or tax-supported colleges and universities in Illinois.

The scholarship fund, from which high school graduates will benefit, was set up by the recent legislature. Mrs. Petty and other members of the commission will serve without salary.

Other members are Dr. Lloyd S. Michael, principal of Evanston Township High School, the chairman; Msgr. William E. McManus, superintendent of schools of the Catholic Archdiocese of Chicago; Dr. Richard G. Browne of Normal, executive officer of the State Teachers' College Board; Mrs. Faith Jefferson Killings of Chicago, case supervisor of the John Howard Assn.; Loring C. Merwin, Bloomington publisher, and R. A. Bonafield of West Frankfort.

## Lake Villa Woman Buried in Chicago

Mrs. Elizabeth Heller, 65, of Rte. 21, Lake Villa, died Saturday afternoon in St. Therese hospital where she had been a patient two weeks. She had been ill a long time.

Mrs. Heller had lived in Lake Villa the last five years. The husband, Louis, of the home; four daughters, a sister and two brothers, all of Chicago, survive.

The funeral service was held at 2:30 p.m. Tuesday at the Henry W. Mueller Funeral home, 5308 Belmont ave., Chicago.

## Boy Drowns, Girl Struck by Truck, Others Hurt or Ill Result in Rescue Squad Calls

The drowning of an 11-year-old boy at Channel lake, the death of a tack, and the serious injury of a 9-year-old girl, who was struck by a truck were among the many services of the Antioch Rescue Squad called for during the past week.

Michael F. Stephens, 11, of 1739 North Keeler ave., Chicago, was found in the water near John's River Inn at Fox River and Rte. 173 Sunday evening almost 24 hours after he fell from a boat driven by Andrezak, 33, of 4145 Drake st., Chicago.

The victim's brother, Laurence James Stephens, 17, and his two sisters, Kathleen Ann, 14, and Margaret May, 23, told Deputies Fred Zeason and William Wood that Andrezak had invited them for a speedboat ride on the Chain of Lakes.

Along about dusk they went to the Wilmot, Wis., dam and were on their way back, they said, when they discovered the boy was missing.

They said that about 2 1/2 miles north of Blarney Island the boat entered a trough in the waves and Andrezak swerved sharply to the left. A few minutes later they couldn't find the boy.

They said Michael had been lying on the motor housing of the stern 30 inches from the deck and even with the guard rail around the outside of the craft.

The Antioch Rescue squad worked in double shifts over night in dragging the waters from Blarney Island to the channel without success. Then on Sunday evening a sister and a brother found the body.

**Girl Struck by Truck**  
Linda Smith, 9, daughter of Mr. and Mrs. George Smith of R.F.D. 3, Antioch, suffered a compound fracture of the right arm and serious internal injuries Monday when she was struck by a truck while on her way home from school on Rte. 173 at Channel Lake. Her mother reports today that she is in a critical condition.

## Antioch Beats Wilmot, Will Play Wauconda Here Saturday Night

### Intercepted, Pass, Touchdown by Meyer Caused Defeat of Panthers

Antioch High will play its first conference football game of the season against Wauconda here at 8:30 p.m. Saturday after having won a non-conference game with the Wilmot (Wis.) Panthers here last Saturday night, 6 to 0.

Wauconda High, shocked by the death of one of its players, and the serious injury of another in the same automobile accident, has rebuilt its team, and is expecting to give the Sequoias a tough battle.

Antioch already knows tough competition, for the Sequoias were held nearly on even terms Saturday by the Wilmot Panthers and it was only after Elvin Meyer, center, intercepted a Panther pass and ran 41 yards to a touchdown in the final quarter that the home team was able to gain a victory.

During the first half Wilmot held the advantage and threatened to score twice, but penalties drew them back. Wally Partenheimer took the ball around end and sprinted to the three-yard line, but a clipping penalty stopped the Panther threat.

In the second period Coach Bucci's boys reached the Antioch 20, but an offside penalty stopped the drive. Antioch never got within the 35 yard line in the first half.

The Sequoias came back stronger in the second half, however, and the statistics were in their favor.

The Panthers will host Mukwonago tomorrow (Friday) night and Coach Bucci says the event will be bigger than a homecoming, for the visitors threaten to be the top power in the Southern Lakes conference. Mukwonago has 100 boys out for football and a five-man coaching staff.

Statistics on the game are:  
W A  
First downs 8 10  
Net Yards Rushing 97 96  
Net Yards Passing 5 13  
Net Yards Gained 102 100

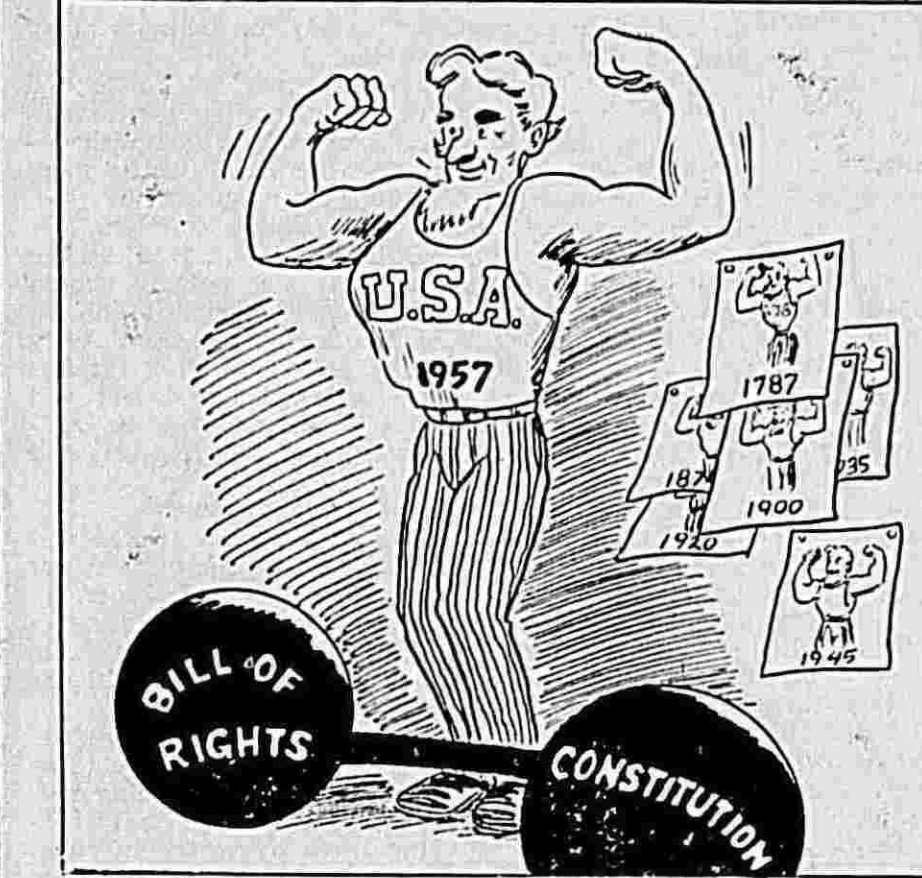

Passing:  
Attempted 7 8  
Completed 2 3  
Yards Penalized 55 55

Statistics provided by Coach Robert Walther of Antioch showed that Bill Hart carried the ball four times and averaged 3 yards per try. George Lystlund carried the ball 12 times and averaged 2.3 yards. Don Pyle carried the ball 15 times and averaged 4.2 yards, and Dick Gudgeon averaged 6.4 yards in five attempts. Gudgeon made the longest run for Antioch, traveling 13 yards.

Coach Walther says the Wauconda Bulldogs use the split-T formation, have a fast backfield and rely much on passing.

The preliminary game between the Antioch-Wauconda lower classmen will start at 8:30 and the varsity at 8:30 p.m. Saturday.

## THE RIGHT EXERCISE FOR GROWTH

## Musicians, Principals-Coaches, Committee On Unit Dist. Meet at A.T.H.S. Same Time

## Four Persons Injured In Rte. 173 Collision

Four persons were injured early Sunday in a collision on Rte. 173 east of Hickory Corner, Rte. 45.

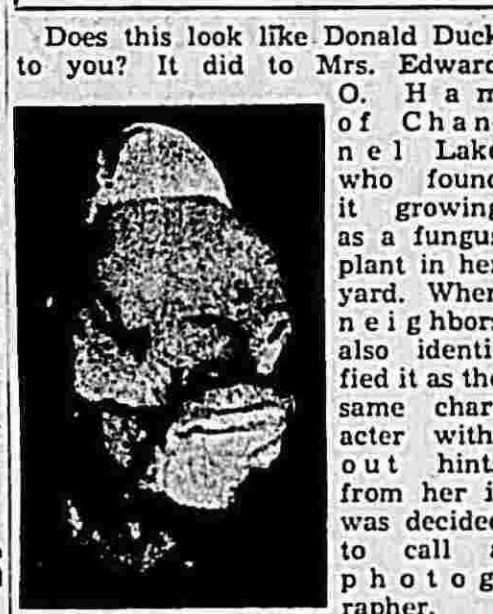

The cars of Nealis H. Palmer, 21, of 2005 Pine st., and Donald G. Weaver, 41, of 1310 Richards pl., Zion, were involved in the accident.

Deputy sheriffs said Palmer was headed east on Rte. 173 when his car struck the car of Weaver on a slippery pavement. The Palmer car ran onto the shoulder and rolled over, landing upside down. The other car also ran onto the shoulder.

Injured were Palmer, suffered a head bump; Weaver, a back injury; Dugdale Conwill, 20, Waukegan, facial bruise; and Mrs. Orene Weaver, 38, back injury.

Palmer will appear before Justice of the Peace Emil Lindvall in Waukegan Sept. 23 to answer to a charge of reckless driving.

## Look Like Donald Duck?

## Viola Lovelace, 50, Dies After Long Illness

Mrs. Viola Lovelace, 50, Antioch, died September 13 at her home on Hwy. 83, following a lingering illness. She was born February 27, 1907 at Edgerton, Wis. She lived at Edgerton until coming to Antioch in 1940. She became the wife of Victor A. Lovelace Sept. 21, 1940, at Lake Villa. She was a member of the Edgerton Methodist church.

Survivors are her husband and two brothers, Carl and William Henks, both of Janesville.

Funeral services were held at 3:30 Monday afternoon at the Strang Funeral home. The Rev. Howard C. Benson of the Methodist church officiated. Interment was in Hillside cemetery.

## P.T.A. Hears Lecture On Travels of Atty. Noll

Illustrating his lecture with motion pictures, John Noll, Waukegan attorney, told of his travels in South America to members of the Antioch Parent-Teacher Assn., Monday evening.

Noll made the trip by automobile, crossing many rugged parts of the country.

The room count was won by Mrs. Ruth Baethke's first grade, and second prize was won by Mrs. George Garland's class. A total of 134 persons answered roll call.

Refreshments were served by eighth grade mothers. Mrs. Donald Gable and Mrs. Howard Rudolph were in charge.

## THE ANTIOCH TOWNSHIP HIGH SCHOOL WAS A BUSY PLACE TUESDAY EVENING

The sub-committees of the Fact Finding Committee on the proposed unit school system, began intensive study of conditions to ascertain whether the unit system is feasible. This study will last a month and a meeting will be held Oct. 15 to come to some conclusions on the idea. Robert Denman of Millburn is the committee chairman.

At the same time coaches and principals of the Northwest Suburban Conference dined in the cafeteria and discussed the place of athletics in the school program. President H. L. Wesner, Lake Zurich, told the audience of 70 persons that athletics are important, but no more important than other phases of school activity.

The third group meeting at the high school was the Antioch High School Music Association. It planned a minstrel show to raise money for a tour which the select band and the choir would make. The show in which students and adults will take part is scheduled for February. The tour would take the musicians to Detroit.

It was reported that the school band got a second place rating at the Illinois State fair.

## Salem to Play Horlick; Loses to Nicolet 6-0 In Conference Game

The Salem Central Falcons will step outside their own conference tomorrow (Friday) evening in playing a home game against the strong Racine Horlick High football team of the Big Eight Conference.

Kickoff time will be 8 p.m.

The Falcons worked this week in polishing up their offense which was their weakest point last Friday evening in their 6 to 0 loss to Fox Point Nicolet, a fellow member of the Braveland Conference.

Art Perry, fullback, who was out of last week's game, is expected to be back in the lineup with his 195 pounds of energy.

If Coach Dorm Grams' boys are big, he found the Nicolet boys even bigger. Central got only four first downs and their visitors but five.

The only score of the game came when Nicolet's Gary Adelman ran 14 yards around right end late in the third quarter for a touchdown. The kick for extra point went wide.

Gram's Falcons took the kick-off and marched down the field to Nicolet's 20-yard line for what appeared to become the tying touchdown, but Dennis Eggert intercepted a pass and ran back 60 yards to the Central 20-yard line. There the visitors threatened to score, but the Falcons held their line and thwarted the effort.

Dorms praised his line and singled out John Lichter, 270-pound tackle as one of the stars.

"Our offense just wasn't clicking, and every time we did start to roll, something like a pass interception would derail us," Dorms said.

## Lions Meet Monday

Antioch Lions will meet at Smart's Country House Monday evening at a business session. The fall golf tournament is scheduled for October 2, Dr. James Kopriva said.

Mr. and Mrs. Homer Alred of Sheridan, Ill., were recent guests of Mrs. Homer B. Gaston.

## Antioch Telephone Service Unaffected By Installer's Strike

### Little Trouble Experienced In Long Distance Calls To Picketed Plants

Except for long distance calls to and from picketed plants, Antioch telephone users felt little effect of Workers of America strike that was started Monday.

The dispute is between the equipment installers and the Western Electric Co., but the strikers established picket lines in such cities as Waukegan which other unions including telephone operators of the Bell Telephone Co. refused to cross.

Richard Hawkins, manager of the Antioch exchange, said that no picket line was established here and that all local employees are working.

Calls from Antioch elsewhere over a long distance line often found the "voice with a smile" absent, and a man's voice asking for a repeat of the number.

Strike-bound plants were manned by administrative personnel. At Waukegan none of the 150 operators reported for work. Where dial systems operate there was no difficulty, but where it was necessary to call long distance a long wait was sometimes necessary.

A press release Monday from the Western Electric Co. said that an agreement has been reached with four of the five C.W.A. unions, but that the fifth union despite two offers of increased wages, had elected to strike Monday morning, holding out for a 16-cent an hour wage increase.

Bargaining is continuing.

## Open House Sept. 26 At A. T. H. S. For All Parents of Students

Three community-parent-teacher meetings are scheduled for the 1957-58 school year at Antioch Township High School.

The first will be an open house on Thursday evening, Sept. 26. The Student Council will serve as guides, and each parent will be given his child's daily schedule of classes to follow on a shortened program.

That evening there will be assembly in the auditorium from 8 to 8:30, and the class schedules from 8:30 to 9:30 p.m. From 9:30 to 10:30 p.m. there will be a social hour in the cafeteria.

The second meeting will be on Tuesday, Jan. 7 when chemistry students, with Elroy Robinson, instructor, will show chemistry teaching methods and techniques, and speech students of Patricia Howard will give a one act play.

On April 24, industrial arts and home making departments will demonstrate and exhibit their products.

## Many June Graduates At Antioch High Now Enrolled at College

Among the June graduates of Antioch Township High school which left recently for college with scholarships are Richard Srch, University of Illinois; Gerry Huml, Cornell College at Mt. Vernon, Iowa, and Robert Sturm, Southern Illinois University at Carbondale.

Others attending college from the class are Lynn Bolton and Judy Horton, Carroll College at Waukegan, Wis.; Janet Rogers, Francis Dornier, Frank Albert, Ray Van Patten, Bill Barnstable, and Harry Miller, University of Illinois; Dave Valkenaar, Navy Pier Branch of the University of Illinois;

Mary Shepard, William Woods College at Fulton, Mo.; John Steitz and Elmer Oelkers, Bradley University at Peoria; Fred Libert, Cornell in Iowa; Marilu Bushing, Blackburn at Carlinville; Sid Parker, Millen College at Milton, Wis.; Celia Hojem, Lake Forest College; Ralph Zeien, Beloit College and Jay Cribb, Lakeland College, Sheboygan, Wis.

Jeanne Filiatreault is studying nursing at St. Therese hospital.

**Undergoes Operation**  
John C. Bratrude of Osmond ave. recently underwent surgery at Watonwan Memorial hospital at St. James, Minn. His brother, Dr. E. J. Bratrude was one of the attending surgeons.

**License Revoked**  
Secretary of State Charles F. Carpenter recently announced the revocation of the driver's license of Gene Hester, Box 706, Antioch, for driving while intoxicated.

### Threshing Day

A stubble field near the little town of Silverton, Oregon, is the scene of a highly unusual annual event—and one which has become a rousing success. The event is "Threshing Day." And its unusualness stems from the fact that the threshing is done by ancient steam-powered machines. At this year's observance, 18 of the veterans were on display and 11 of them actually ran. The oldest dates back to 1889. About 7,000 people came to watch the show, and some pitched in to cut wood to fire the boilers.

These venerable monsters deserve their day in the sun. They have and will hold an honored place in the history of farming. They helped to make the agricultural revolution, along with the tractor, the cotton picker, and all the other mechanical implements. And they serve to emphasize something else—the enormous progress made by the farm equipment industry since its beginning. The old machines were marvels in their time—they were far better than anything that had preceded them. But, by modern standards, they are hopelessly slow, inefficient, dependent on man power, and obsolete.

This brings up another worthwhile point. Modern farm equipment is an excellent buy. Prices have risen, of course, like all other prices—but, generally speaking, they have not risen as much as farm income. On top of that, the machines are fast, economical to run, and comparatively trouble-free—all of which means money saved to the owner. Agriculture has come a long, long way since the machines that participated in Silverton's "Threshing Day" left the factories.

### Take a Wilderness Holiday

Why holiday in Wilderness country? Why are a thousand more cars each month going into Canada through Fort Frances alone for fishing? That's from 3,000 to 4,000 more people each month than a year ago, when the increase was nearly as many over the former year. This is happening all along the Canadian border at virtually all the ports of entry—although the percentage of increase at Fort Frances is among the highest.

Do they come merely to fish? There are fish everywhere. True, in some waters, there may be more fishermen than fish. Yes, they come to fish. Most people tell us they have to have some good reason for driving so far from home—and fishing is apparently the reason—they admit with a twinkle of the eye, and then they go on to explain that fishing is simply an excuse rather than a reason for coming great distances to holiday in the country of drinking water fishing lakes, a country of meandering, listless streams, some literally

choked with massive beds of the fabulous yellow-centered white waterlilies; a country of jagged granite gorges through which foaming white-water rapids tumble onward and onward to the seas of the north; a country of pine trees, millions of acres of majestic Norway and white pines, spindly jackpines or scrubby jack pines atop the rock ridges; a country of wild pincherberries, Saskatoons, chokecherries, raspberries, strawberries, a country of deer, moose, bear, ducks, of wild life in apparent profusion, a country of warm days but cool, and even cold nights.

But these things, this wild life, this wild fruit, this water, the fish, the game, are found in many parts of the continent.

True, but not in the complete combination in which they are available in Canadian country. But there is one appeal, perhaps above all others, the ability to be alone—or nearly so. This, to many men, is the greatest appeal.

In this day of extreme urgency, of hustle and bustle, of hypertension, of crowds and endless crowds of people and of endless tasks to be accomplished—there comes a time or times when it is literally more than some individuals' systems can withstand.

They have to call a halt—take a holiday. More and more people are coming to realize from practical experience that the holiday should be as much as possible a complete opposite of the daily grind. Away from the crowds of people. Away from stacks of files on the desk clamoring for immediate attention, away from choked streets and highways, away from farm chores, away from business cares and worries, away from shop projects and responsibilities.

The healing wilderness is the answer. Man was once a creature of nature as are the animals of the wilderness today. His present life is not natural. It is artificial; created by him to increase his capacity for producing goods and services to create an easier artificial life. This life has many benefits and most of us would not give it up. We will not regress.

But man, being by nature a creature of nature, must on occasion return to nature. He must, or ought to go, when it is necessary, to the healing wilderness—to ease and heal the scars of the daily battle for existence, the competitive battle for survival. And he should do his in the most leisurely manner possible.

If a man is to retain his efficiency there are times when he must relax—mentally relax—from everyday strains.

New life and a zest for living return with a holiday in the healing wilderness.

Today at the Wilderness Research Center at Basswood Lake, and on the Minnesota Superior Forest and Ontario Quetico park, a study is in progress concerning exactly how much value is afforded by a holiday in wilderness country, how many holidays each year are necessary for the greatest benefit to a man, and how often such holidays should be undertaken.

While awaiting the findings of this study, which by its very nature will have to continue for years until anything resembling definite data appears, we do know that some holidays of reasonable duration are vital to man's well-being.

It may be fishing, camping out under the stars, or canoeing, wildlife photography, hiking in the woods, in effect it is man's communion with nature in the healing wilderness.

## Public Service Company's LITTLE BILL Invites

You to Our **OPEN HOUSE**

This Sunday, September 22 - 1:00 to 4:00 P.M.

REFRESHMENTS!

... at our NEW WAUKEGAN SERVICE CENTER  
(Located on Waukegan's Washington Street just west of Green Bay Road)

See, first hand, how our electric "task force" operates 24 hours a day to bring you efficient service. ...

SEE—

- Radio dispatching demonstration — how electric service calls are quickly handled.

- Display of aerial ladders, line construction trucks, pole-hole diggers.
- Modern utility and safety equipment display.
- Super-fast electronic range.
- Amazing new Heat Pump—the modern electric way to heat and cool your home.

Waukegan-Lake Villa District — important in industry, commerce and agriculture—is an integral part of the Public Service Company-Commonwealth Edison electric system. By next summer, when one of the world's largest units goes into operation at Waukegan Station, the system will have enough generating capacity to produce more than 4,500,000 kilowatts of electricity for your benefit.

Large-scale generation such as this is necessary in Northern Illinois to keep up with the rapid growth: more use of labor-saving, pleasure-giving home appliances; greater industrial demands for power, and rapidly growing electrification of farm chores. The Company plans to enlarge even that record capacity in the coming years. Millions will be spent to assure a plentiful source of vital electricity ... and efficient distribution of it ... essential to the continued prosperity and well-being of your community and others served by the Public Service Company.

**DON'T FORGET OUR DATE - This Sunday - 1-4 P.M.**

We think you'll find our electric OPEN HOUSE both interesting and educational ... we'll be looking for you!

## Entire Car Body Submerged in Paint

DETROIT—A revolutionary new "body dip" painting process which completely rust-proofs automobile bodies inside and out will be used by American Motors Corporation on its 1958 models, which went into production August 19.

The dip method, under which the entire car body is submerged in a giant tank containing a rust-preventer primer, is the first used by an American automobile manufacturer, according to E. W. Bernitt, vice-president of automotive operations.

"We believe it is one of the most important advances in automobile finishing processes since the early varnish days of the industry," Bernitt said. "Our automatic spray painting method and finishes have been among the most advanced in the automobile industry, and we believe the new dip process will give us further superiority in the finishing area."

The process has been under development by the company nearly three years.

"During this period we studied all makes of new and used cars and cut apart a great many of them to examine the effects of hidden corrosion," Bernitt said. "Most of the deterioration of the body due to rust takes place from the inside out. After exhaustive tests we were convinced that the critical areas of rusting are in the hidden areas of car bodies, which can be reached with a primer only by the dip method. The human element of error also is eliminated."

Body-dip processes, Bernitt said, have been used extensively by European car manufacturers, but have never before been used in this country. Hitherto, the bigger American bodies have been too difficult to handle under European methods. Their smaller bodies were suspended and rotated in paint on a "spit." American Motors' Metropolitan, which is built in England, has been painted by dipping since it was first put into production in 1954.

With this innovation, all sheet metal, including the insides of doors, pillars, sills and other areas inaccessible to spray coating, will be protected from rust with the primer.

"This method of finishing a car will virtually eliminate body rust, thereby lengthening the life of a car body," Bernitt said. "The more beautiful and more permanent finishes will result in higher resale values of such cars."

The corrosion problem has been accentuated in recent years by increased use of salt on roads during the winter and by the use of more complex shapes of sheet metal on cars, which result in areas where moisture and dirt can collect.

Before dipping, the body is bonderized, a process which further prevents rust. After the primer dip each body is scuffed and then painted with two coats of enamel; for two-toning two more coats of enamel are applied.

The tank into which the bodies are dipped by overhead monorail is 91-feet long, seven-feet six-inches wide, and six-feet deep. The tank contains 15,000 gallons of the primer, known as Ferrochrome, a red oxide alkyl fortified with zinc chromate made by Pittsburgh Plate Glass Co. Each body takes approximately two gallons.

The installation necessary for the process is now in operation at the American Motors' Milwaukee plant. A similar set-up soon will be completed at the Kenosha (Wis.) facility. Bodies for the recently announced 100-inch wheelbase car to be introduced late this fall by AM will be produced at Kenosha, while all other 1958 bodies will be produced in Milwaukee. All final assembly of AM cars is in Kenosha.

A simple blood test that could determine in six minutes whether a person is mentally ill is being experimentally tested.

A standardized reproducible method of destroying red cells in blood to produce uremia in dogs and to help evaluate remedial treatment for shock and severe burns has been developed by Armour Research Foundation of Illinois Institute of Technology, Chicago.

## Tax Facts

A trend that taxpayers have the "right to know" the facts about their State government has developed in Illinois during 1957. This trend is heartening, because it is evident both in the legislative and executive branches of the government.

At its recent session the General Assembly passed a bill, sponsored by Representative Paul Simon of Troy, that requires all meetings of tax supported bodies to be open to the public. Naturally the new statute excepts certain meetings and information, such as deliberations for decisions of the Illinois Pardon and Parole Board, the divulgence of which would not be to the best interests of citizens and taxpayers. Not only will the new law make it easy for the taxpayer to learn how his tax dollar is being spent, but it will go a long way toward gaining the confidence of the public for the officials serving on the governing board.

The records management bills resulting from the last session of the General Assembly also contain provisions which insure the public the right to inspect and view State records.

Not to be out-done by the legislative branch of the State government, State Auditor Elbert S. Smith reported to the General Assembly, and to the public, regarding the expenditure of monies from a deficiency appropriation made to his office. Auditor Smith's report was not only complete and frank, but it showed a return of \$146,000 of the original \$369,259 appropriation to the State's treasury.

The doors are opening—now it becomes the duty of taxpayers to take advantage of their new opportunity. Only an informed public can vote intelligently for officials who will protect their interests. Officials who make their records and meetings an open book show a desire to work for the public's welfare and should be encouraged.

A good loud horn on a self-propelled combine lets the truck driver know when to pull up to the machine to dump the grain.

The Lakes Theatre and The Antioch News invite Mr. L. D. Bever, Rte. 3, Box 402, Antioch, Ill., and one to attend Friday or Saturday's showing of "The Pride and the Passion" at the Lakes Theatre.

## Mary E. Schwicht Becomes Bride Of Mr. Matteoni

Miss Mary Elizabeth Schwicht became the bride of Pfc. John R. Matteoni in a recent ceremony in St. Peter's church. The bride is the daughter of Mr. and Mrs. Louis Schwicht of Lake Villa and the bridegroom is the son of Mr. and Mrs. Peter Matteoni of Antioch.

Given in marriage by her father, the bride chose for her wedding a gown of chantilly lace and nylon tulle over satin. The fitted jeweled bodice was styled with a mandarin collar and short sleeves and the bouffant skirt featured side tiers of lace, sweeping into a short train.

A jeweled headpiece held her fingertip veil. Her flowers were pink and white carnations, pink rose buds and stephanotis.

Mrs. Fritz Baumann served as her sister's maid of honor, wearing a gown of pale pink chiffon. Mrs. George Pahlke, sister of the bridegroom, as bridesmaid wore a gown of pink chiffon. Gerry Huml attended the bridegroom as best man. Kenny Anderson ushered. Karen Schwicht, niece of the bride was flower girl and Miss Beverly Hart sang accompanied at the organ by Mrs. Thomas McGreal.

After a reception at the Lake Villa V.F.W. the newlyweds left for a wedding trip enroute to Camp Pendleton, Calif., where the bridegroom is stationed with the U. S. Marines.

### W. L. STRAHAN HONORED WITH PICNIC SUNDAY

A picnic was held Sunday at the W. L. Strahan residence at 398 First st. in honor of R. E. Dunk, district manager of Investors Diversified Services, Inc.

All members of the district and their families were present. They are R. E. Dunk, Waukegan; W. A. Dinan, Wheaton; E. F. Dunk, West Chicago; Q. Fox, Aurora; M. L. Kuehnert, Crystal Lake; G. Le Gault, Lake Bluff; J. P. Nugent, Waukegan; and E. E. Richards, Jr., Highland Park.

### To Attend U. of Ill.

Miss Janet G. Rogers

Miss Janet G. Rogers, daughter of Mr. and Mrs. Harry F. Rogers, Bluff Lake, Antioch, began her studies in pre-journalism this past week at the University of Illinois, Urbana. Miss Rogers is a recent graduate of Antioch High school. She is pledging Alpha Xi Delta.

### GARDEN CLUB TO HOLD MEETING SEPT. 23

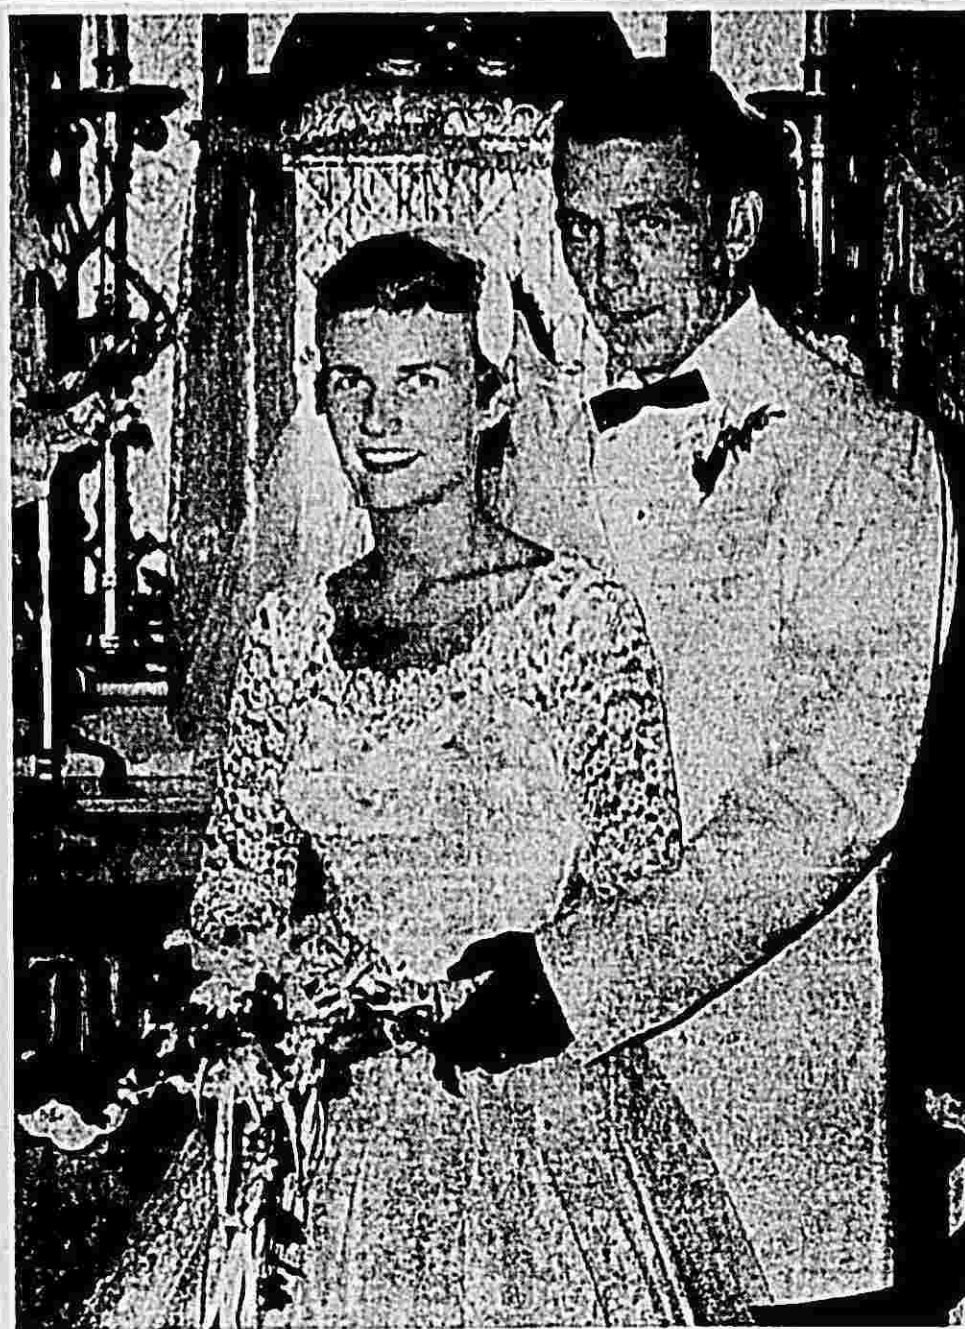

The Antioch Garden Club will hold a meeting Monday, Sept. 23, at the home of Mrs. Fred Oschman, Linden Lane. Mrs. Lillian Vandewerker will be co-hostess. Mrs. Dudley Kennedy will lead the discussion on peonies and Mrs. Jesse Thompson will lead a discussion on dahlias and their care.

### Local Resident Wins ESO Award

Raino Lystila, R. 1, Box 510A, Antioch, (second row, second from right) was among employees honored at a recent Beneficial Suggestion award ceremony, at the Electronics Supply Office, Great Lakes. Captain H. J. Goldberg, Supply Corps, U. S. Navy, Commanding Officer at ESO presented an award of \$10 to Mr. Lystila. Others receiving awards are: Row 1, (left to right) Mitchell Sepkowski, Mrs. Lillian Gatchin, Mrs. Josephine Jackson and Mrs. Mary Lowe, with Captain Goldberg. Row 2, Hiram Schier, Harold Soderstrom, William Kendall and Mrs. Marguerite Moon.

### Miss Diane Sheehan Is Bride of A. J. Masopust

### Mr. and Mrs. Allen J. Masopust

Miss Diane Sheehan, daughter of Mr. and Mrs. D. E. Sheehan, 1026 Victoria st., became the bride of Allen J. Masopust, son of Mr. and Mrs. George Masopust, Third ave., September 7, at St. Peter's Catholic church.

### GRASS LAKE P.T.A. TO HOLD BAKE SALE

The Grass Lake Parent Teachers Association plans to hold a home bakery sale Saturday, Sept. 21, at Lyons-Ryan Ford salesroom. Sale will start at 9 a. m. The next regular meeting of the association will be postponed due to the construction in progress at the school. The next meeting date will be announced later.

### M. Y. F. Meetings Set

Methodist Youth Fellowship organizations will go into action this week.

An Intermediate Methodist Youth Fellowship meeting will be held from 7 to 8:15 p. m. Friday. There will be a scavenger hunt, worship workshop, and refreshments will be served.

The High School M.Y.F. will meet at 6 p. m. Sunday. There will be a potluck supper followed by an informal meeting to introduce the M.Y.F. to prospective members.

### ALTAR & ROSARY SOCIETY TO HOLD FALL LUNCHEON

St. Peter's Altar and Rosary Society will hold its annual Fall Luncheon at 12:30 Sept. 30, at the Angels Restaurant. A style show will be presented by MariAnne's of Antioch. Reservations must be made by Sept. 27, with Mrs. Rudy Eckert or Mrs. Pat Schneider.

### Attention Parents and Cubs of Pack 80

The first pack meeting of the new Cub Scout calendar year will take place on Thursday, Sept. 26, at 8 p. m. sharp at the Grass Lake school. Boys 8 to 11 years of age who intend to join Pack 80 are urged to attend this meeting with their parents. Visitors welcome.

Jimmie Gerber, son of Mr. and Mrs. William Gerber, underwent an appendectomy at Victory Memorial hospital Friday. He was able to return home Monday, and is convalescing at his home.

St. Peter's church was the setting at 11 a. m. September 7 for the marriage of Miss Diane M. Sheehan and Allen J. Masopust. The double ring ceremony was performed by the Rev. F. Johnson.

The bride is the daughter of Mr. and Mrs. D. E. Sheehan, 1026 Victoria street, and the bridegroom is the son of Mr. and Mrs. George Masopust, Third avenue. Wedding music was sung by Ronnie Peters accompanied at the organ by Mrs. Dorothy McGreal.

The bride was given in marriage by her father. She chose for her wedding a gown of princess lace with fitted bodice, fashioned round neckline, embroidered with sequins and pearls, tapered sleeves. The bouffant skirt featured inserted pleated nylon panels. Her headpiece of matching calotte trimmed with scalloped pleated nylon tulle, sequin trim, held her fingertip veil of French illusion. She carried a lace covered prayer book with a cascade arrangements of stephanotis and ivy leaves centered with a white orchid.

Matron of honor was the bride's sister, Mrs. Nancy Barth. She wore a melon colored nylon sheath gown, and bridesmaids were the Misses Janet Sheehan, sister of the bride, Janice Kork, Donna Wap and Patricia Kennedy. They were dressed alike in princess style gowns green color in ballerina-length. The matron of honor carried a cascade of yellow glads with ivy streamers and the bridesmaids carried cascade bouquets of flame colored glads with ivy streamers. The flower girls, Dianne Kessenich and Debbie Toft, were gowned in floor length dresses and carried baskets filled with tiny yellow garter roses. Mrs. Phil Vos had charge of the guest book.

Attending the bridegroom as best man was his brother, Donald Masopust, and ushers were Mike Haviland, Harry Wilson, Gene Barth, and John McClure.

The new Mr. and Mrs. Masopust greeted guests at the Angels Restaurant following the ceremony. After a wedding trip to Niagara Falls, they will be at home to their friends at Lake Villa.

The bride is a graduate of Antioch Township High school and attended the State Normal University. The bridegroom is a graduate of Antioch Township High school.

### ENTERTAINS PINOCCHIO CLUB

Mrs. Mollie Somerville was hostess to the members of her pinocchio club Tuesday afternoon at the home of her son and wife, Mr. and Mrs. Earle Somerville, Calvin Drive, Leola Lake. Prizes awarded the winners of highest scores were: Mesdames T. M. Palaske, Simon Simonson and Lois Leese.

Mesdames George Grunow, Clara Westlake, Ethel Runyard, Miss Belle Richards, Mr. and Mrs. William Sanberg, Mr. and Mrs. William Frye, Mrs. W. C. Henslee and Mrs. Jensen spent Monday with Mr. and Mrs. Robert Dewes at their home in Northbrook. Mr. and Mrs. Dewes are former residents of Antioch.

Antioch Chapter Order of the Eastern Star Past Matrons club will hold a meeting Thursday evening, Oct. 3, at 8 p. m. at the home of Mrs. Paul Ferris, Lake Marie.

**HELP FOR MOM AND DAD**  
**CHILDREN GROWING!** a series of programs on the emotional and social development of children from birth to adolescence, will begin at 9:30 p. m. Tuesday, October 8, on WTTW—Channel 11.

The 13 week series will feature Mrs. Maria Piers, consultant to the Child Care Program of the Institute for Psychoanalysis. It will be presented under the auspices of the Institute and the Welfare Council of Metropolitan Chicago.

Appearing with Mrs. Piers each week will be Lee Wilcox, who will serve as hostess on the series.

### It Isn't The Heat — It's The Stupidity

With a shirt which is tight around the neck, a tie which he wears for the sake of "appearance," a tight belt around the middle, and a felt hat, the average man emerges for his battle with old man Sol. He is a likely candidate for heat prostration. To counteract the heat, our friend will consume quantities of ice-cold soft drinks with the result that there is a shock to his system which can bring on headaches and fainting spells. Moreover, the drink is a syrupy mixture and being a heating agent, adds to his general discomfort. Another thing about the "refreshing" drink is that there is just enough alum to dry out our friend's mouth so he will immediately want another—a vicious circle, for each time the sugar makes him want more.

If you think the ladies are more sensible, try again! The apparel she wears may be lighter—she may go hatless, but because she too has certain appearances to maintain, she will retain that old and famous instrument of torture—the girdle, which was once called a corset. This shuts out the air, constricts the abdomen and the organs therein, and adds to general discomfort.

She has learned that there is no need for "excessive perspiration." So she saves embarrassment by using a deodorant. Sure enough, it clogs the pores and smells sweet.

Come vacation time, these folk cram themselves with meat and potatoes and toast their hides under the blazing sun. They peel while they eat hot-dogs and syrupy, cold soft drinks. While their body craves the protecting vitamins found in oranges and lemons, and green-leaved salads, these folk consume greasy hamburgers.

When the hot weather arrives, remember, "It isn't the heat, it's the stupidity." Relax and partake of all good things in moderation.

By the Editor of the Almanack, 1733

Thousands knew him as Richard Saunders, and he scored "firsts" in the U. S. In such endeavors as—first sensational newspaper... first free library... first fire department; he founded a university, analyzed why chimneys smoke, and corrected the Declaration of Independence.

CLUE: TIKE DAN YEK

ANSWER: ————  
The clue and key recall the famous Poor Richard's Almanack.

....Did you know that pineapple grows on plants three to four feet high? It takes almost 2 years for a pineapple to mature, which explains why it is grown in a tropical climate where a year-round average temperature of 75 degrees creates just the right atmosphere for its culture.

Mrs. B. R. Burke returned home Tuesday after spending the past week in Peoria the guest of Mrs. W. W. Warriner.

The Women's Society of Christian service of the Spring Grove Methodist church will hold an ice cream social, September 21 at 5:30 p. m. at the town hall, in Spring Grove. All proceeds will go to the organ fund.

William Wilton, son of Mr. and Mrs. Robert J. Wilton, 984 Victoria street, left Antioch Sunday for Peoria, where he will attend Bradley University.

Mr. and Mrs. Norman Benson of Rte. 4, Antioch, left Wednesday for Phoenix, Arizona, where they expect to make their future home.

### Most Valuable Player

Gary Schlunz, right, chosen by the players on the Yankee team of the Antioch Little League as the most valuable player, is shown with the team manager, George Horn. Gary will be candidate for the Pony League team next year.

### War Veterans' Orphans Can Get Educational Aid up to 36 Months

War orphans' education is still available to sons and daughters of veterans who died in World Wars I and II and the Korean Conflict, the Antioch American Legion post has been notified.

Young men and women may receive up to 36 months of education with the Veterans Administration paying them an allowance up to \$110 for each month of schooling completed.

A recent enactment of the Illinois State legislature provides payment up to \$150 for education of these persons. The state educational benefit can be paid to children in school of the ages of 10 to 18, who for 12 months immediately preceding their application had their home in Illinois.

Inquiries may be made of Cmdr. G. W. Jensen of the Antioch post of the Illinois Veterans' commission.

### Beginning Dance Classes

The Lake Promenaders Square and Round Dance club will start its fall season for beginners with meetings held at the Grayslake Grade school at Lake st., and Rte. 120, starting at 8 p. m. Saturday and thereafter on the first and third Saturday evenings.

Intermediates met last Saturday and spent an enjoyable evening. Guest caller was Frank Walker of Chicago. Regular callers are Fred and Minette Wood and Art Peterson. Public dances are held there the second and fourth Saturdays.

### New Model House Uses Roof Truss From U. of Ill.

Urbana-Champaign, Ill.—The new research house, opened near Washington, D. C. by the National Association of Home Builders, features a king-post, nail-glued roof truss, which was designed by the University of Illinois Small Homes Council.

The king-post truss is one of nine roof truss designs for which the University of Illinois has published instruction sheets. The nail-glued technique was developed here in cooperation with the Wood Research Laboratory of Purdue University. The trusses provide extreme stiffness, thereby minimizing deflections. Their load-carrying capacity is about 1100 lbs. per square foot. The roof has a slope of 2 inches in 12 and a span of 32 feet, 8 inches.

The fundamental purpose behind the research house, located at 3811 Denfield Ave., Kensington, Md., was to develop a better house at a lower cost. It was intended that the house should represent evolutionary rather than revolutionary progress—two to five years, not 15 to 20 years in advance. The new developments in the house are expected to have immediate practical value.

The structural system of the house used component construction which can be easily adopted by the small volume builder as well as the large.

Instruction sheets for the king-post nail-glued roof truss are available from the Small Homes Council, Mumford House, Urbana, Ill., for 25 cents each. Among other designs are ones for hip roof, slope ceilings, plywood web roof frames, "W" trusses. The spans vary from 20 feet 8 inches to 40 feet 8 inches. Roof slopes of 2, 3, and 4 inches in 12 are included among the designs.

### ADJUDICATION AND CLAIM DAY NOTICE

NOTICE IS HEREBY GIVEN to all persons that the first Monday of November, 1957, is the claim date in the estate of SANDER L. W. KAEHNE, Deceased, pending in the Probate Court of Lake County, Illinois, and that claims may be filed against the said estate on or before said date without issuance of summons. All claims filed against said estate on or before said date and not contested, will be adjudicated on the first Tuesday after the first Monday of the next succeeding month at 10 A. M.

## Letters to The Editor

September 14, 1957

Dear Sir:

I have been a subscriber and reader of the Antioch News ever since I arrived in this field of work and have enjoyed the type of news printed: The News is a very fine paper.

Especially may I express my sincere appreciation for the coverage given to Lakeland Baptist Church in recent weeks. I feel that special consideration was given and am very grateful. May this be the beginning of a long and close relation between the community and Lakeland Church.

Most cordially,  
Rev. Dale J. Van Hovel

### Boom or Bust in 60's?

#### Kiplinger Says Boom

Washington, D. C.—Current fears of a serious recession are not warranted, according to a special report by the Kiplinger organization, just released. A period of "normal progress" for the next five or six years is predicted by the Washington business reporting firm.

Any letdown or slump will be temporary, the editors say, a pause—not a deep slump or depression.

Then, in five or six years, a new boom will set off "the greatest era of economic growth this country has ever known." Underlying the new boom are these facts:

Population: Extra high birth rates in the '40's and '50's will produce a population bulge in the '60's and '70's of young men and women marrying or ready to marry. Marriages make homes, homes make business.

New products, new ideas: Technical, scientific and mechanical developments of the past few years are being rushed into use, producing a crop of new products.

Government Policy: Both parties and all political groups are bullish, committed to full employment and an economy going at full speed, with the government an active partner.

#### More Inflation

The bad news is that more inflation will accompany the boom, according to the Kiplinger report. Prices will go higher—in ten years, 15 per cent higher, in 25 years, 50 per cent higher.

### Heart Surgery

#### Termed "Bloodless"

A new aid to "bloodless" heart surgery was introduced to the medical profession this week by the pharmaceutical company Abbott Laboratories, North Chicago, Ill.

The company announced a siliconed bottle containing Heparin in Saline for keeping blood in a fluid state while it is circulating outside the body.

More than 100 investigators in hospitals throughout the nation used the bottle successfully in the majority of available heart-lung machines.

The product is used in cardiac surgery where an artificial heart-lung apparatus is employed to circulate the patient's blood outside the body in order that the surgeon may have a bloodless approach to the interior of the heart.

Blood from a donor is collected in the bottle and is used to prime the apparatus and to replace blood as required during surgery.

The heart-lung machines substitute for the heart and lungs in circulating oxygenated blood through the body. The apparatus receives blood which has circulated through the body and has given up its oxygen, saturates it with oxygen and pumps it back to the body.

The Abbott development offers several advantages over other methods of preserving blood in this type of surgery. Heparin in Saline delays coagulation of blood, and the cured silicone coating on the inner wall of the bottle provides a non-wettable surface which minimizes injury to blood cells.

Heparin's effect on coagulation

is readily determined and easily controlled. No difficulties with excess electrolytes are encountered with heparin as they are with some other solutions when large quantities of blood are involved.

### Properly Maintained Tires and Brakes Are A Safety Must

Defective tires and brakes can be killers.

Tires that are cut and worn thin invite a motor vehicle accident.

In time of stress—especially when going around curves—they may fail. Blowouts or unsafe tires are factors in one of every 100 fatal traffic accidents and in one of every 100 accidents.

To lessen the chance of blowouts, you should:

1. Rotate tires regularly.
2. Have tires checked by competent garageman.
3. Watch for tell-tale signs—frequent loss of air, for example—of tire failure.
4. Replace worn tires periodically.

Brake failures are reported in two of every 100 accidents and in two of every 100 fatal accidents.

So-called long brakes—brakes that must be pushed near the floorboard before they work—will cause trouble when quick stops are necessary. Brakes that require frequent pumping are dangerous, too.

Brakes that can stop a car traveling 20 miles an hour in a distance of 17 or 18 feet are rated excellent.

Average brakes can stop a car at 20 miles an hour within 21 feet. At the same speed, most cars can stop within 25 feet.

Powerful brakes are safety factors, of course, but they can be dangerous, too, if they are used to stop a vehicle with complete suddenness.

Passengers may slide off seats and be injured. Children, in particular, may be hurt because their legs are too short for them to brace against foot rests.

Sudden stops of trucks may result in a load shift and cause overturning.

Of 316 private terminals to be found on the 981-mile long Ohio river, 75 are for handling of coal that moves on the river by barge. These coal docks constitute almost 24 per cent of the private terminals on the river.

If your tractor is stored in the open, a tin can or weather cap on the exhaust pipe will prevent water from entering the engine. Some engines have a small hole in the manifold to let the water escape. Be sure the exhaust is clear.

## WINDOW TREATMENT TIPS

Window treatments can be a challenge to your decorating ability, but results are rewarding when you've solved a problem and made your windows important.

The first rule to remember in planning window treatments is to use plenty of material. Finished draperies should be double-or-triple-window width, depending on sheer-ness.

Select fabrics with care and purpose. Consider activity and style of furnishings for each room. When purchasing, ask questions as to washability, care, and fading. Give thought to the style you want when selecting the fabric, and be sure it is suitable to your family, the room and the window.

You can widen narrow windows by hanging draperies on either side of the window on extender rods. This gives the full effect of the window for light, and makes the window appear larger.

Minimize an off-size window or group of different-size windows by using draperies the color of the wall. Try this with small fireplace windows, using a print on other windows.

Select the right hardware for your window treatment. You can choose from many types and styles in hardware just as in draperies. And, be sure to provide needed privacy with shades, blinds, or shutters in addition to draperies or curtains.

## In Memoriam

In loving memory of our beloved Husband, Father and Grandfather, Alfred J. Pedersen, who passed away Sept. 23, 1950.

Loving Wife and Family

## Card of Thanks

I wish to thank all by friends, neighbors and relatives, the Antioch Grade School personnel, Antioch Chapter O. E. S., the Rainbow Girls, and the Esther Circle of the Methodist church for the flowers, gifts, cards and letters I received during my illness.

I also wish to thank the members of the Antioch Rescue squad.

Ann Heath

## Card of Thanks

Michael Murrie wishes to express his appreciation and thanks to all his friends for the many cards and gifts received while in the hospital and at home.

## Card of Thanks

We, Albert and Marie Sima, want to express our thanks to all of our "friends" for the lovely gifts and congratulatory cards and best wishes, and their presence at our celebration for helping us to make this day more enjoyable and unforgettable, also best thanks to H. J. Litchfield for his part in our celebration. We also wish to express our thanks to Gov. and Mrs. Stratton for their kind letter of congratulations and best wishes on our golden wedding anniversary. And our thanks to Smart's Country House for the delicious food and refreshments.

Thank you all very much.

Albert and Marie Sima

## Red Cross Issues Call For Volunteer Service

The Lake County Chapter, American Red Cross, is urgently in need of qualified volunteers such as Gray Ladies to serve at the U. S. Naval Hospital, Veterans' Hospital at Downey and other activities such as Motor Services, Staff Aides and Canteen Service. A training course is planned for early in October.

During the past year more than 12,500 volunteer hours have been given by the volunteers that have worked with the chapter. For further information, please contact the Red Cross office, Post Office Box 98, Waukegan, Illinois, or call Ontario 2-4044.

## Company's Unique Program Sending Many Kids to Camp

NEW YORK—Many underprivileged children went to camp this summer as a result of a unique program instituted by a Pennsylvania manufacturing company.

The company, the Niagara Therapy Corporation of Adamsville, Pa., recruited its sales force of more than 1,000 distributors, dealers and salesman behind the unusual campaign which it termed "Operation Holiday."

Owen K. Murphy, president of the company, said that each of his dealer and distributor organizations were asked to sponsor at least one or more children in their community for camp.

In describing the plan, Murphy said that each dealer organization set up a Crown Pin Club made up of local salesmen who have done outstanding sales jobs. The primary function of each club is to aid underprivileged children. Each member of the club makes a weekly contribution towards the maintenance of the organization. "Many of our sales personnel have made the club their principal avocation," Murphy said.

"Not only do they finance the youngsters to camp, but they also visit, write, and send them gift parcels," he added. "For many of our people it's like going to camp themselves."

Completely subsidized by its members, each club holds regular meetings to consider and map plans for aiding the underprivileged children of the community. The organizations cooperate closely with local welfare agencies and civic organizations in placing the youngsters in camp.

## 'Dead' Languages Held Helpful

LOS ANGELES—If you want to put life in your English, then study the so-called "dead" languages.

With 27 per cent of English words derived from Latin and Greek, persons with even a primary knowledge of these languages are able to use English more intelligently and appreciatively, according to Paul Friedlander, professor emeritus of Latin and Greek at the University of California.

"Besides," he says, "it makes reading, writing and talking a lot more fun if you are aware of the 'family history' of a word, such as the Greek origin of 'idea' and 'philosophy,' 'tragedy,' 'comedy,' etc."

"As science grows," Professor Friedlander declares, "so grows the use of Latin and Greek. Many new drugs and medical discoveries bear Greek or Latin names. And since popular magazines and newspapers now consider science a major news field, and since the terminology of psychology is now a household word, the public has more and more need to understand the words being used in order to avoid being confused."

## Student Counselor

Frank Denison

Frank Denison, who has a master of science degree from Indiana University, is educational and vocational guidance counselor at Antioch Township High School.

## The Toss of a Coin at Wilmot - - Antioch Football Game

The toss of the coin here won by Wilmot, was the start of the season's first football game at Antioch Township High School last Saturday night. Shown left to right, are Referee Leonard Bass, Sequoit Captains David Mitchell, Frank Sebasta, and Elvin Meyer; Official Jack Sticksel, and Wilmot Captain Jack LaMer. While Wilmot won the toss, Antioch won the game 6 to 0.

## Kindergarten Pupils in Classes at Scout House

These are exciting days for children beginning their kindergarten training at the Scout House. Mrs. Harrison Brown, teacher, has 40 pupils in her afternoon class, and 40 others in the morning class. Because the Scout House has log siding, the children can say they began their schooling in a log cabin.

Miss Lorraine Frantz, girls' physical education teacher and teacher of typing at Antioch Township High School, is one of the new members of the staff. She has a bachelor of science degree from Eastern Illinois University.

## Just for Fun by Robert C. Preble President Encyclopaedia Britannica

Unravel the jumbled clue and see if you can guess the answer, which has as many letters as there are dashes. The answer is printed upside down.

Scientists are now extracting potassium and magnesium from a source that also contains trillions of dollars worth of as-yet-unavailable gold. Can you name the source?

CLUE: NIRBY PEDE

ANSWER: — — — — —

The waters of the ocean, India, do not contain an estimated billion dollars worth of gold, but they do contain potassium and magnesium. Auger mining, a 12-year-old method of mining coal, now produces some six million tons of coal annually. In this method coal is mined from areas now suitable for surface mining.

## U. S. Pays 80 Billions To States, Individuals

NEW YORK—The Federal Government has paid a total of \$80½ billions to States as grants-in-aid and to individuals in the States over the 23-year period from 1934 to 1956, inclusive, according to a study recently made public by the Congressional Joint Committee on Reduction of Nonessential Federal Expenditures, of which Senator Harry F. Byrd is chairman.

Some 60 per cent of this total, adding up to \$49½ billions, went to individuals, with payments to States and local units making up the balance. Veterans were the leading recipients in the individual sector, receiving an aggregate of \$16½ billions in the 1934-56 period. A total of more than 125 programs were involved in these payments. In general, the trend of these outlays has been up except for veterans, who received their biggest payments from the Federal Government in the 1948-52 period.

## British to Give Extra Pay to Cut-Off Soldiers

LONDON—The British Government recently announced that military men who lose their jobs through the streamlining of the armed forces would be given going-away grants as high as \$16,800. The amounts vary with rank and length of service, the figure above representing the amount that would go to colonels with 15 years' service.

All the grants would be tax free and in addition to normal retirement pay and terminal grants previously paid.

Britain plans to slash its armed forces from 690,000 men to 375,000 men within the next five years.

... and him that cometh to me I will in no wise cast out.—(St. John 6, 37.)

Sometimes, for reasons that we vainly try to justify, we look upon another human being with distaste or contempt. Then we should remember the abounding compassion of the Lord Jesus Christ, and humbly pray for His forgiveness.

A McGraw-Hill survey finds that American manufacturers will spend \$7,300,000,000 on research this year, for an all-time record.

## Keep Kids Safe

CHICAGO—If you must store junior's toys in the garage or basement, advises Toy Guidance Council, keep them as far as possible from your workshop equipment. Tools and machines usually attract youngsters who are not capable of handling them safely. Make sure your tools are out of their reach.

## Cost Never Changes

PRINCETON, Mo.—When Mrs. Lorene Curtis, widowed Circuit Court clerk and recorder of deeds, filled out a marriage license for Ellis Wilcox, she charged him the usual rate of \$2, same as anyone else, even though she signed her own name as the prospective bride.

## YOU and your DOG

### EARS

Everyone knows that a dog hears much better than a human. But frequently a dog's ears are neglected by dog owners.

The Sergeant's Dog Care Center of Richmond, Va., warns against ear canker, a condition caused by accumulations of dirt, wax, moisture, or parasites. External canker can result from lacerating wounds of the ear flap.

Ear troubles are most prevalent in breeds whose ear flaps are always turned down, preventing air from getting inside.

It's a good bet a dog is suffering from canker when he frequently shakes his head, scratches the ears, or rubs his head on the floor. There is intense itching and redness of the ear flap or ear canal, swelling of membranes, inflammation, or a discharge from the ear canal, swelling of membranes, inflammation, or a discharge from the ear canal.

A canine ear creme for treating both internal and external canker is available at drug or pet stores.

The best way to avoid ear troubles is to make cleaning of the ears a regular part of dog care routine.

Coal tows on inland U. S. waters frequently extend for as much as 1,170 feet, a length greater than that of the ocean liner Queen Elizabeth, which is 1,031 feet long.

## EDDIE the EDUCATOR says

The permanent wave of children plus changing circumstances bring more school problems. Planning and action should not be delayed.

Illinois Education Association

## Freedom and Responsibility

"Newspapers are powerful instruments in molding public opinion. If the press can print only that which is fed from those in control, as is the case of Communist Russia, then the state of a country is truly deplorable. On the other hand, freedom of the press has limitations. Libel, falsehood, distortion of facts, are not to be countenanced. Responsibility for truth, fairness and historic perspective are vital to the retention of freedom of expression. Like all other rights, this one carries tremendous responsibilities."—Illinois State Register.

Tractor accidents kill more than 1,000 farm people each year. About one-third of these fatalities occur on highways.

An Old Timer is a fellow who remembers when a man did his own withholding on his take-home pay.

# D-X BORON

## smoother power better mileage

### READ WHAT THESE MOTORISTS SAY:

#### '57 Ford owner says:

My car really performs with D-X Boron. I've found it has much more pep and power with this new fuel.

#### '56 Cadillac owner says:

D-X Boron is in a class all by itself. Gives good power, better getaway... increases mileage, too.

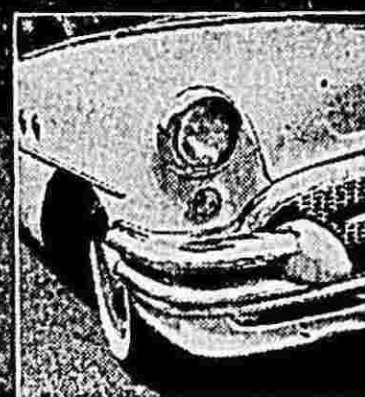

#### '57 Chevrolet owner says:

This new D-X Boron gives me around sixteen more miles per tankful. It's a good buy for power, too.

#### '54 Mercury owner says:

My car definitely runs smoother and has a great deal more pep. I will continue to use this new fuel.

#### '55 Buick owner says:

... A superior product. This gasoline runs smoother and quieter. Absolutely won't knock or ping.

#### '52 Plymouth owner says:

I get more mileage—around 16 more miles per tankful—with D-X Boron. My engine runs much smoother.

### Life begins with D-X BORON for every car, any age

Old car, new car... small car, big car... D-X Boron gives your engine new life. It liberates more go per gallon. It delivers up to 16 more miles per tankful of the smoothest power you can buy.

And forget about knock! D-X Boron has highest octane in our history. Find out at your D-X Dealer's why it's the most-talked-about motor fuel in the country. Sold on money-back guarantee. D-X still gives the famous plus—D-X upper-cylinder lubrication!

## BETTER SCHOOLS -- AND YOU

by HENRY TOY, Jr., President  
National Citizens Council for Better Schools

## WHAT MAKES A SCHOOL "GOOD"?

Americans just don't stay in one place. I've moved four times since I've been married and I'll bet I'm not permanently settled yet. We don't just move from one house to another in the same town, either. Like many Americans who move, we change states as well as houses.

This mobility of our population creates problems for the schools and for the parents of school-age children. Here's just one problem the schools face. Many of the school districts today that need classrooms, teachers, textbooks—just about everything—didn't even exist a few years ago. They're new housing developments in suburban areas and nobody anticipated how many children would be crowding into schools.

There's the classic case of an enormous housing development put up for GIs after World War II. Thousands of houses were built and everything was thought of by the engineers. They made space for a community swimming pool, super markets, churches, police stations, fire house. The only thing they left out of the blueprints were schools. These GIs were young married men and they bought the houses, moving in with their wives and kids. It was years before they got a regular school where the children could go full time.

Parents who have to move for one reason or another write us and ask whether the schools are good in the communities they're going to. This is an awfully hard question to answer with a yes or no. But there are some yardsticks you can use to measure a good school.

Find out how many teachers a

school has for how many students. Find out if the students are going to school full-time or if they have to go on half-day sessions. Find out what courses are offered. Find out, if you can, how much of an interest the community takes in its schools. If it's an alive community that recognizes the importance of its schools, chances are your child will get a better education there. But there's another side to this question of a moving population. People are moving into communities as well as out of them. Are your schools the kind that attract new people?

A few years ago, we asked major corporations what they looked for in deciding where to build a plant. To a man, these executives told us that one of the first things they found out was how good the schools were.

A community that lets its schools go to pot is one thing keeping new blood and new industry out of town. No wonder so many Chambers of Commerce and other local businessmen are getting behind programs to improve their local schools.

If you'd like information on how you can help improve your schools, drop me a postcard. Just send it to Better Schools, 9 East 40th Street, New York 16, New York, and I'll let you know what other communities are doing.

## BETTER SCHOOLS BUILD

## BETTER COMMUNITIES

Night Time Traffic Toll Points Up  
Need For Modern Highway Lighting

It is a well known fact among traffic statisticians that only about one-third of a day's normal traffic volume is on the streets and highways during the hours of darkness.

Yet, nearly every day of the year more fatal accidents occur at night than in the daytime. This was called to our attention again just recently when the State of Massachusetts released its 1956 accident figures.

In the hours of daylight (6:00 A.M. to 6:00 P.M.), 195 persons lost their lives in traffic accidents. Note that these hours include both, so called, morning and evening "rush hours" when many workers wend their way to and from work.

And yet we see that in the hours between 6:00 P.M. and 6:00 A.M. 306 persons lost their lives—111 more fatalities than occurred during daylight and yet—only about one-third as much traffic flow was on the streets and highways.

To what can we attribute these disproportionate odds? To but one major factor—the inability to see!

Since our human faculties and reflexes break down with the coming of darkness, we must look for a solution. Either we must create super-human beings, able to see as well at night as in daylight, or—we must provide the present human with enough light to see after dark.

Even though the vehicles involved in these fatal crashes were

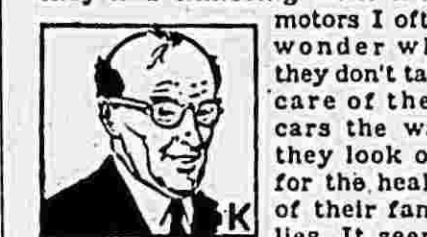

equipped with headlights, they evidently were not enough. At today's high speeds we need more than headlights. We need fixed illumination systems on our streets and highways. The files are filled with instances of drastic accident reduction—yes, and even some accident elimination when modern street lighting was installed. Yet, many of our officials responsible for such measures take a lackadaisical, yes—even an indifferent attitude toward fixed illumination systems. Many say they are too expensive to install and maintain—that we can't afford it. The Street and Highway Safety Lighting Bureau says we can't afford not to install them. And they say they have the figures to back up this fact.

Wake up America! Look out of your house windows; out the windshield of your car. Are your streets well illuminated? Could you see a child dart from the shadows along the curb in time to stop before you heard that terrible thud of steel against flesh? Ask yourself! It is your responsibility—the responsibility of everyone reading this article. If your answer is no—or even if your answer is doubtful, don't wait any longer. Write your Mayor; write your Congressman. Write anyone who has it in his power to help erase the shadows in which death lurks. Do it now. Tomorrow may be too late!

When I hear my friends complaining about the running condition of their cars and the grief they had tinkering with their motors I often wonder why they don't take care of their cars the way they look out for the health of their families. It seems obvious, don't do it yourself, see a specialist in the field—in this case your nearest qualified service mechanic.

I hate to admit it, but I can remember when the family car used to come equipped with a complete kit of tools and instructions intended for emergency use. But Willkens is a little heavier around the middle now, has lost a few hairs and added a few grey ones. And his car as well as yours demands more than a kit of tools and a superficial knowledge of mechanics to cope with the intricacies of today's fuel system, carburetors, ignition and cooling systems and many other devices which are today's car.

Field and factory training schools have been established by the larger manufacturers to train mechanics in the complexities of today's cars. Carter Carburetor division of ACF Industries, the nation's largest independent manufacturer of automotive fuel systems, alone has trained more than 30,000 qualified service mechanics in the United States.

Housewife Keeps  
Busy Corresponding  
With 20,000 Women

TOLEDO, Ohio—How would you like to keep up a regular correspondence with 20,000 women you've never seen?

That's regular routine for a Toledo woman who deals with 20,000 American homemakers serving as "consultants" for her husband's market research firm.

The woman is Mrs. Howard Trumbull, vice president of National Family Opinion, Inc., which has its headquarters in downtown Toledo and an office in New York City. She's "Mrs. Trumbull" to the firm and "Clara" to her husband who founded the business 10 years ago, but to homemakers in Council Bluffs, Iowa; Craig, Colo.; Blue Mound, Ill.; Los Angeles, Chicago, Miami, Brooklyn, and thousands of other communities across the country, she's "Carol Adams."

She's the woman to whom homemakers speak their minds confidentially about packages they don't like, a new jelly that someone plans to place on the market, an improved sewing machine, and many other products.

The "consultants" are not paid, Mrs. Trumbull explains, but seem to find a special kind of pleasure in being able to tell American business firms what they like and, very often, dislike about their products.

Because Mrs. Trumbull, via her "Carol Adams" pen name, can speak to homemakers on a chat, informal level, get "straight from the shoulder" opinions about products before they are placed on the market, and guarantee her consultants that they will remain anonymous, National Family Opinion has no difficulty obtaining information it asks in behalf of its clients.

Dinosaurs Once  
Dominated Earth

WASHINGTON—Dinosaurs were the dominant animals on earth for approximately 130,000,000 years. Man and his more or less

human-like forerunners have been here, at the most, less than 2 million years, and all human history covers a maximum of little more than 10,000 years. The earliest mammal like creatures date back hardly more than 150 million years.

The story of this long supremacy of a race of extinct reptiles, which first appeared 200,000,000 years ago and persisted to the dawn of the age of mammals about 70,000,000 years ago, is told by Dr. David H. Dunkle, of the Smithsonian Institution's Division of Vertebrate Paleontology, in a 24-page illustrated booklet published by the Institution.

These reptiles, whose nearest extant relatives are the vastly different birds and crocodiles, included the largest creatures ever to inhabit the land. Some of them, however, were no bigger than chickens. During their long tenure of existence they underwent fantastic variations. Many walked upright on their hind legs. Some got about on all four legs. Some developed heavy suits of bony armor.

Pen Not Mightier Than  
Typewriter, It Seems

LOS ANGELES—The pen may be mightier than the sword but the college student who uses it in preference to a typewriter is likely to get knifed when it comes to a term grade.

"In school work, business and private life the typewritten page is becoming the only acceptable form of communication," according to Dr. Allen Robertson Russon, visiting associate professor of office management and business education at the University of California, Los Angeles.

"The world is too big, busy and impatient to decipher bizarre handwritings," she said. "The typewriter has become an appendage of modern man's fingers and the ability to operate one is now as essential as handwriting used to be."

Yet, she said, many high school students who plan to enter college, where they must prepare volumes of term reports, essays and the like, aren't encouraged to take typing classes because they are studying an academic instead of a commercial curriculum.

THE CARTOON FIRST PUBLISHED IN 1955 IS REPRINTED ON REQUEST WITH 1956 STATISTICS.

Most of us at times are in a hurry. And that's when we can easily make the slightest mistake, end up in an accident. Failure to see what's ahead, a misstep, lack of thinking, help to put us in a situation where we can easily run into trouble. Take it easy, cut out the hurrying. It helps prevent accidents.

Ordinarily I'm not one to waste anything but last month I threw away a half bushel of peaches and several quarts of cherries.

We went on a buying spree at a country fruit stand, thinking we'd eat some, can some, and share the rest with our neighbors. Only our neighbors had the same idea that particular week-end and we couldn't give away a single peach. Before I got around to canning them all, they had spoiled!

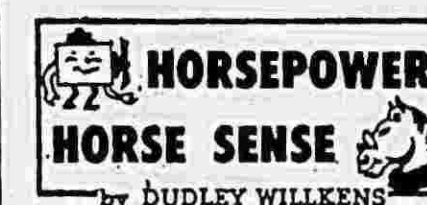

Bill told our sad story to the couple next door but got no sympathy. Instead, he got a look inside their big new RCA Whirlpool upright freezer neatly laden with country-fresh fruits and vegetables.

"Honey, come on over here," he called. "Have I made a discovery?" Well, I've seen a freezer before, but I assumed a wide-eyed expression and let Bill tell me all about it. He showed me the five fast-freeze shelves and the gilding baskets at the bottom of the cabinet. "And take a look at this door," he urged. "The shelves are adjustable and these gates hold every package in place."

It was I who noticed that the freezer was made by Whirlpool Corporation, the same people who made our automatic washer and dryer. That's all I really needed to know.

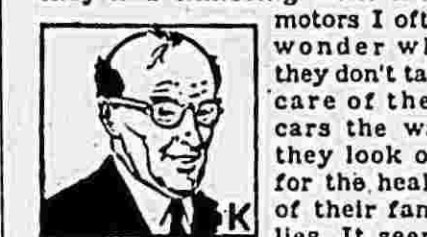

"Bill," I mused, "I think we really need a freezer like this." And Bill agreed.

If I had planned it cunningly and far in advance, I couldn't have done a better job of selling my husband on that freezer.

by DUDLEY WILLKENS

When I hear my friends complaining about the running condition of their cars and the grief they had tinkering with their

obvious, don't do it yourself, see a specialist in the field—in this case your nearest qualified service mechanic.

I hate to admit it, but I can remember when the family car used to come equipped with a complete kit of tools and instructions intended for emergency use. But Willkens is a little heavier around the middle now, has lost a few hairs and added a few grey ones. And his car as well as yours demands more than a kit of tools and a superficial knowledge of mechanics to cope with the intricacies of today's fuel system, carburetors, ignition and cooling systems and many other devices which are today's car.

Field and factory training schools have been established by the larger manufacturers to train mechanics in the complexities of today's cars. Carter Carburetor division of ACF Industries, the nation's largest independent manufacturer of automotive fuel systems, alone has trained more than 30,000 qualified service mechanics in the United States.

## Cost of Pensions, Retirement Plans, Rising Steadily

CHICAGO—The annual cost of private and public pensions and retirement programs has been rising steadily in keeping with the growth of these plans in recent years and added up to more than \$13 billions in 1956.

That sum represents the combined payments by employers and employees as contributions into the funds to provide the benefits under the various plans. On an overall basis, close to two-thirds of the payments were made by employers, including Government, for those on the public payroll; but the employer proportion is very much larger under private plans alone, insured and non-insured.

Indicative of the size they have attained and their economic impact, the combined pension and retirement program contributions in 1956 were the equivalent of about 4 cents of every dollar of total personal income before taxes last year. They figure out to approximately \$200 for everybody employed in the civilian working population.

With contributions of more than \$13 billions a year and still rising, and with combined assets that approached the \$75 billion mark at the end of last year, pension and retirement programs have become a major factor in the nation's savings and investment process though there are basic distinctions with regard to how private and public plans operate in this respect.

The size and scope of these plans, and the certainty that they will grow in the years to come, likewise point up one of the big stakes in the current fight against inflation and the efforts to prevent a further erosion in the buying power of the dollar.

## Forestry Program Has Proved Merits

WASHINGTON—Forest industries of the United States are leaders in the greatest forestry renaissance the world has ever known.

An era of forest management, launched with the birth of the industry-operated American Tree Farm System just 16 years ago, already has seen timber growth brought back into balance with removal—for the first time in the twentieth century.

Industry's leadership in the Tree Farm movement reaches beyond the practice of good forestry on industry's own lands. It is reaching out to help and encourage the 4,500,000 small landowners whose holdings constitute the greatest potential timber source in the country.

With investments in plants, equipment and land conservatively estimated at more than \$20,000,000,000, the wood-using industries of the country have adopted good forestry practices as a matter of good business and good citizenship.

## Wood Preservatives Can Make Furnishings Last

CHICAGO—Homeowners can add years to the useful life of wooden furnishings by treating them with a wood preservative.

Picnic furniture, swings and gliders, and other accessories to outdoor living are easily treated against wood decay by applying a preservative to dry unpainted or unvarnished wood. Paint can be applied over the preservative after it is thoroughly dry.

Two excellent, easily applied materials can be obtained in either concentrated or ready-to-use form, from hardware stores, paint shops or lumber yards. They are pentachlorophenol, often referred to as "penta," and copper naphthenate.

Both are sold under various trade names. The label will indicate when one of these chemicals is present and give directions for applying it. If a large quantity of preservative is required, it is less expensive to buy a concentrate and mix it, as directed, with a light diesel oil or fuel oil.

## Engineer Output of Colleges Is Increasing

MINNEAPOLIS—In our technological race with Russia, U.S. schools have graduated an estimated 35,000 bachelors of engineering in the academic year recently completed. The annual output is up 50 per cent from the alarming low point of 1953-54 and will show a further increase of close to 10 per cent next year.

Over 5,000 additional men received advanced engineering degrees during the 1956-57 academic period. The size of this group of masters' and doctors' degrees varies little from year to year; it is offset by a closely equivalent number of four year engineering bachelors who remain in school for graduate study.

## GUIDE TO GOOD DRIVING

### Play It Safe -- Prepare Car Now For Freezing Weather

With winter's first chill in the air, it's time to put up storm windows, take clothes out of storage—and get the family car ready for freezing weather. Safety depends on not only how you drive—but on how well your car is prepared for snow, ice, and slush.

Early servicing, or "winterizing," prevents your car from getting caught in a sudden cold snap without anti-freeze. This can save you a badly damaged engine and a stiff repair bill.

Here are a few tips from cooling system experts of the Du Pont Company, manufacturer of "Zerone" and "Zerex" anti-freezes:

1. To be safe, have your car winterized early by your local serviceman. There's no waiting in line. And he'll have time to thoroughly check the cooling system.

2. Before adding anti-freeze, drain and flush the cooling system with a chemical cleaner. This gets rid of accumulated rust-sludge, which can clog the radiator and cause an overheated engine.

3. Check radiator and hose connections for leaks. Replace worn and cracked hoses and fan belts.

4. Have your engine tuned up, and check the battery.

5. Select the type of anti-freeze that best suits your needs. So-called "permanent"

type anti-freeze can be used in any car, anywhere, in any climate and altitude. One shot, which lasts all winter, is good for driving in temperatures even lower than 30 degrees below zero. For average winter driving, however, a standard anti-freeze offers safe, sure protection. It costs less than permanent—and you need less of it. And it won't boil away in modern pressurized cooling systems.

6. For safety's sake, ask your serviceman to check the defroster, windshield wipers, and brakes. Replace smooth tires—they're dangerous on icy roads. Or have snow tires put on. If you use chains, get them checked for broken links.

Two final suggestions: when driving on icy roads, don't follow other vehicles too closely. And if you start skidding, don't jam on the brakes—turn the front wheels in the direction of the skid.

## Nine-tenths of Mower Accidents Involved Rotary Type Mowers

Chicago—The power lawn mower may save Dad an aching back—but it can give him or Junior a pain in the hallux.

"Accident Facts," statistical yearbook of the National Safety Council, doesn't explain that the hallux is the big toe, but it does point out that the hallux, the four smaller toes and other parts of the foot are most frequently injured in power mower accidents.

A recent survey by the Georgia Department of Public Health revealed that one power mower injury in seven resulted in some permanent disability. Information for the survey was obtained from about one-fourth of the doctors in Georgia.

They reported 737 accidents in which 794 persons were injured during a period of less than two years. Direct contact with mowers caused 553 of the injuries. Objects thrown by the mowers accounted for 241.

More than nine-tenths of the accidents involved rotary type mowers, as compared with less than one-tenth for the reel type. No figures are available on the number of mowers of each type, but it is believed that the accident total for rotary mowers is due in part to the large number in use.

Fast-acting tranquilizing drugs that have proved effective for treatment of humans now are being used with equal success for animals.

They offer considerable promise in minimizing stress in animals during shipment. In one experiment, calves were treated with a tranquilizing drug before shipment from the range and an equal number of calves were not treated. Treated calves had a lower incidence of shipping fever.

## Watch Your Speed And Your Life

If you have an accident while driving 25 m.p.h., the chance of someone being killed is only one in 300. But for each additional 10 m.p.h., you greatly increase the chance for a fatality.

The 1957 edition of "Accident Facts," the statistical yearbook of the National Safety Council, shows that the chance of an accident being fatal at 35 m.p.h., is one in 115, at 45, one in 70, at 55, one in 40, at 65, one in 20, and at 75, one in 8.

## Just for Fun

by Robert C. Preble

President

Encyclopaedia Britannica

Unravel the jumbled clue and see if you can guess the answer, which has as many letters as there are dashes. The answer is printed upside down.

Aristotle referred to it as an "Indian ass," and many authorities believe the ancients confused it with the rhinoceros. A cup made of one of its horns was thought to be proof against poison.

CLUE: SOULAFUB

ANSWER: —————

From the clue word "fabulous" we find the pictured beast is the unicorn, whose supposed horn was used in the French word "unicorn" to test the king's food.

## Millburn

Mrs. Frank Edwards, Correspondent  
Phone Elliot 6-3323

Regular services at Millburn Congregational church Sept. 22 include Sunday School at 9:30 a. m. and Church Services at 9:30 and 11 a. m.

Rosebuds on the pulpit last Sunday morning were for the new babies, Cindy Jr., daughter of Mr. and Mrs. Vern Plotz, born Sept. 7, and Timothy Frank, son of Mr. and Mrs. Gordon Duncan, born Sept. 12.

The confirmation class presented The Layman's Fellowship Bell to the Millburn church at the 9:30 service, Sunday.

The Study Group met Thursday morning at the home of Mrs. Bert Doolittle. After the meeting each member and guest presented Mrs. A. Weindorf a gift with their name embroidered on it. A delightful luncheon was served by the hostess, Mrs. Doolittle. Mrs. Weindorf will soon be leaving for her new home in Des Plaines. The next meeting will be Sept. 26, at the home of Mrs. Lyman Thain.

Virdeen Alshouse of 811 Nachusa Ave., Dixon, Ill., a former resident of Lake county, passed away at the age of 88. Survivors include his widow, Josephine, and five sons, Samuel of Oelwein, Iowa, Clarence of Arlington, Iowa, Mildred of Zion, Darnell of Gurnee and Paul of Antioch, and one daughter, Viola Hansen of Lake Forest, and a number of grandchildren and great grandchildren. Funeral services were held Wednesday at 11 a. m. at Dixon and burial at Hazelton, Iowa.

Robert Clark, son of Mrs. Harley Clark, of Fort Leonard Wood, Mo., is home for a twelve day leave before he leaves for another camp in Colorado.

Frank Hauser returned home last Wednesday from Victory Memorial hospital.

Mr. and Mrs. Edward Melton and children of Waukegan spent Sunday evening at the Herbert Graham home.

Guests at the home of Mr. and Mrs. Herbert Prange on Sunday afternoon and evening were Mr. and Mrs. Bernard Prange and daughter, Gloria, of Lake Forest, Mr. and Mrs. Harold Schenke of Chicago and Mr. and Mrs. Bernard Zinkgraf and son of Mt. Prospect Heights.

Mr. and Mrs. John Edwards and children of Libertyville were supper guests at the home of their

mother, Mrs. Frank Edwards.

Mr. and Mrs. Clarence Hauser of Paris Corners were callers at the Frank Hauser home Sunday afternoon.

Miss Judy Paulsen of Evanston hospital spent Sunday with her parents, Mr. and Mrs. William Paulsen. Mrs. Elsa Lutz of Chicago is visiting her daughter, Mrs. Herbert Messner, for several days.

Mrs. Eva Alling of Waukegan called on Mrs. Frank Edwards Sunday afternoon.

Miss Delores Davis was a caller at the Herbert Prange home Monday, also Robert Kincaid and Frank Rogers of Cleveland, Tenn., who stopped on their way to Missolua, Mont., where they will live with Eugene Prange and attend the State University.

Mr. and Mrs. Bill Powell of Chicago and Richard Waldron and children of Round Lake were dinner guests of Mr. and Mrs. Herbert Graham, Saturday evening.

Mrs. Edward Hoffman received a cablegram on Friday saying that her brother, Evan Watkins of Wales had passed away on Thursday. Funeral services were held Monday.

Baptismal services for Alan Kick, son of Mr. and Mrs. Fred Kick, were held at the Millburn church Sunday afternoon.

Representative Smith of Wisconsin told the House: "No one is closer to the people in his town than the weekly newspaper editor. . . . He had his ear to the ground and his hand on the pulse of public sentiment. He knows by daily personal contact what the people are thinking. As a trained newspaper man he knows how to evaluate public opinion."

In the past 46 years, United States Steel Corp. has produced from its own mines more than one billion tons of coal for use in its mills.

## Lake Villa

Mrs. Fred Bartlett, Correspondent  
Phone Elliot 6-4454

Bertha Fish was surprised Monday evening when a few of her friends gave her a party on her birthday. The following were present: Lela Barnstable, Edna Botts, Helen Fish, Cecile Blumenschein and Matilda Bartlett. Refreshments of salad and cake were served.

Mrs. Walter Schneider, Sr., Cecile Blumenschein and Mrs. Fred Bartlett were Kenosha visitors Tuesday.

Mr. and Mrs. Earl Hucker celebrated their 30th wedding anniversary Saturday, Sept. 7. Friends reminded them of the horse and buggy days thirty years ago when they were married, and furnished a horse and an old fashioned buggy, and they rode from Hucker's sale on Cedar Ave. to their home on Grand Ave. Later friends gathered at their home for a party.

Mrs. Hall of Allendale is a patient at the Lake Forest hospital.

Miss Irene Perry is a patient at the St. Therese hospital.

Mrs. John Sonnenberg of Waukegan was a visitor here last Friday.

Mrs. Victor Young of Fox Lake visited her parents, Mr. and Mrs. Clifford Gerber and her grandmother, Tina Gerber, last Friday.

Mr. and Mrs. A. Heley of East Troy, Wis., were visitors at the Tina Gerber home last Wednesday.

Mrs. Betty Schneider was confined to her home last week because of illness.

Bob Hamlin left Sept. 17 for Loras College, at Dubuque, Iowa.

Lenore McCord will attend Beloit college at Beloit, Wis.

The Royal Neighbors Officers club met last Wednesday at the home of Lorraine Cisar. The following officers from Lake Villa who attended were: Bertha Fish, Helen Fish, Marie Hamlin, Georgia Avery, Edna Somers, Laura Obermaier, Mrs. Nere, Mrs. Helen Reimer, and Genevieve Neuell; from Grass Lake, Irene Brown, Mrs. Shur-

gart, Mary Davis, Elizabeth Anzinger, and Ida Shunneson; from Antioch, Velma Langosh, Gerri Polson, and Lorraine Cisar and a number of visitors were present. Lorraine Cisar and Laura Obermaier were hostesses.

Mr. and Mrs. Richard Cert of Petite Lake are receiving congratulations on the arrival of a daughter, born Sunday, Sept. 8. They also have two sons.

Don Cugler, son of Mr. and Mrs. Clifford Jones of Allendale left Friday to attend Highland University at Las Vegas, New Mexico.

Mrs. Loretta Lauers of Gages Lake was a Saturday visitor at the home of her uncle Fred Schultz of Rte. 45 and Grand Ave. She also visited her grandmother.

Linda, Carol, Judy, Sally and Charles Lauers visited their great uncle, Fred Schultz and their great grandmother, Mrs. Schultz, of Lake Villa. Mrs. Schultz will celebrate her 87th birthday on Oct. 22. Mrs. Schultz is the mother of Mrs. Lillian Card of Venetian Village.

Mrs. Mead and Mrs. Noruett visited the Antique shop on Grand avenue and found many interesting things. The shop is owned and operated by Arthur Kreisten.

Miss Carla Ann Bartlett was a week end visitor at the home of Mr. and Mrs. Stanley Hollis of Waukegan.

Mrs. Della Rogers' condition still remains the same. She suffered a stroke two weeks ago at the home of her daughter, Mrs. Leona Abner, where she is at the present time.

A surprise birthday party was given for Leona and Ralph Abner at their home Sunday. Those attending were Della Rogers, Mr. and Mrs. Jim Brown of Waukegan, Mr. and Mrs. Stanley Hollis and daughter, Carol, of Waukegan, Mr. and Mrs. Fred Bartlett, Jr., and daughter, Carla, of Lake Villa; Mrs. Katherine Collins and daughters, Marie, Rose Mary, Katherine and granddaughter, Jo Ann of Waukegan, Marty Northcutt of Grayslake, and Terry Abner. Also celebrated on

the same day was the 23rd wedding anniversary of Mr. and Mrs. Stanley Hollis of Waukegan. The Abners received many gifts. Birthday cake and ice cream were served.

William Fish was honored at a surprise birthday party at the home of his daughter, Mrs. Chester Hamnens of Waukegan. Those attending were Mr. and Mrs. Oliver Vanderspool, Mr. and Mrs. Jake Wallace of Lake Villa; from Grayslake Mr. and Mrs. Clarence Ritta, Mr. and Mrs. Dick Vanderspool, Mr. and Mrs. Daurence Fish, Mr. and Mrs. Walter Stang and son; from Gurnee Mr. and Mrs. John Vanderspool and Mina Meyers; from Antioch Mr. and Mrs. Henry Wallace and Fanny Lemker; from Waukegan, Mr. and Mrs. Carl Hamnens and Sidney Wallace. His sons and

their wives Mr. and Mrs. Howard Fish and family from Algonquin, and Mr. and Mrs. Jacob Fish of Lake Villa, a number of friends from Lake Zurich were also present.

Rosella McCarthy, Valeria Sheehan and Dorothy Bennecke attended

a dinner in Waukegan Tuesday, September 10 for the polio drive. They represented the VFW Auxiliary at the dinner.

The Rescue Squad and the Volunteer Police of Lake Villa will sponsor a dance Saturday, Sept. 21 at

8 p. m. at the VFW hall on the Soo Line road and Grand ave. The music will be furnished by the "Three Rhythm Lads." It is a "Come as you want and pay what you want" dance. The public is invited.

## Modernize YOUR HEATING SYSTEM

### CONVERT TO OIL OR GAS

High fuel bills, cold  
showers and "deep-  
freeze" bedrooms are  
no laughing matter.  
In this day and time  
they're uncalled for!  
Let us show you how  
we can convert your  
old furnace to a mod-  
ern oil or gas heater  
... for low - cost,  
healthful comfort.
